

Global Manufacturer Chooses Stonhard for High-Risk Production Zone

Products Used: Stonclad® UT • Stonset® TG6 and Stonchem® 821

Application Area: Production facility

PROBLEM

A prominent global manufacturer and supplier of food ingredient solutions sought to improve their production facility in Barcelona, Spain, with a chemical-resistant flooring solution. Routine exposure to substances such as milk acid and corrosive chemicals and solvents had damaged the floor. Spain's governmental regulations also required the new flooring to be conductive to ensure employee safety.

SOLUTION

Stonhard proposed using a combination of products that would protect the floor from deterioration, provide a clean and easily maintainable surface, and meet essential static control specifications. Stonset TG6 grout, Stonclad UT polyurethane flooring and the Stonchem 821 vinyl ester lining were installed over 2,000 sq. ft. throughout the facility. The result delivered the necessary protection against aggressive chemicals, highlighting the manufacturer's commitment to forward-looking solutions in their operational infrastructure.

OUR CERTIFICATIONS & MEMBERSHIPS

Stonhard is committed to sustainability and transparency. We are proud members of the U.S. Green Building Council, a member of the Manufacturer Advisory Panel for the HPD Collaborative, and our products are listed with mindful MATERIALS (mM).

THE STONHARD DIFFERENCE

Stonhard is the unprecedented world leader in manufacturing and installing high-performance seamless, resinous floor, wall, and lining systems. With more than a century of experience, Stonhard provides its customers with a single-source warranty covering both products and installation.
